Compliance Software from BtB Software is designed to handle those all so important, but hard to track laboratory issues such as: Respiratory Fit, Safety training, License Renewals, Lab Accidents, Vaccines, CEU's. The software includes Staff Trak, Standard Operating Procedures (SOP) document and Proficiency Test tracking.
Run it as SAAS (Software as a Service) or hosted on your local SQL database.

Staff Track:

- Generate meeting lists, track attendance
- Email reminders and meeting notices to staff
- Track meeting acceptance and grades
- Track vaccines given or due, including Manufacturer and lot numbers
- Build reports using built-in sort lists
- Set up tickler notifications for vaccine return or license expiration dates
- Track required CEU's/Training for each license or certificate
- Send email notices to the staff and supervisor(s) based on a due date
- Record Laboratory Accidents and outcome

SOP (Standard Operating Procedures):

- Track Documents on your network or the internet
- Sign in/out with roll-over approval
- Email updates on due dates
- Check for over due reports
- Print cover sheets for signatures
- Print tracking results

Proficiency Testing Tracking

- Multiple proficiency organizations and analytes
- Analyte methods; expected normal and ranges
- Email notifications on receipt and due dates
- Search and print results for compliance tracking
